DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

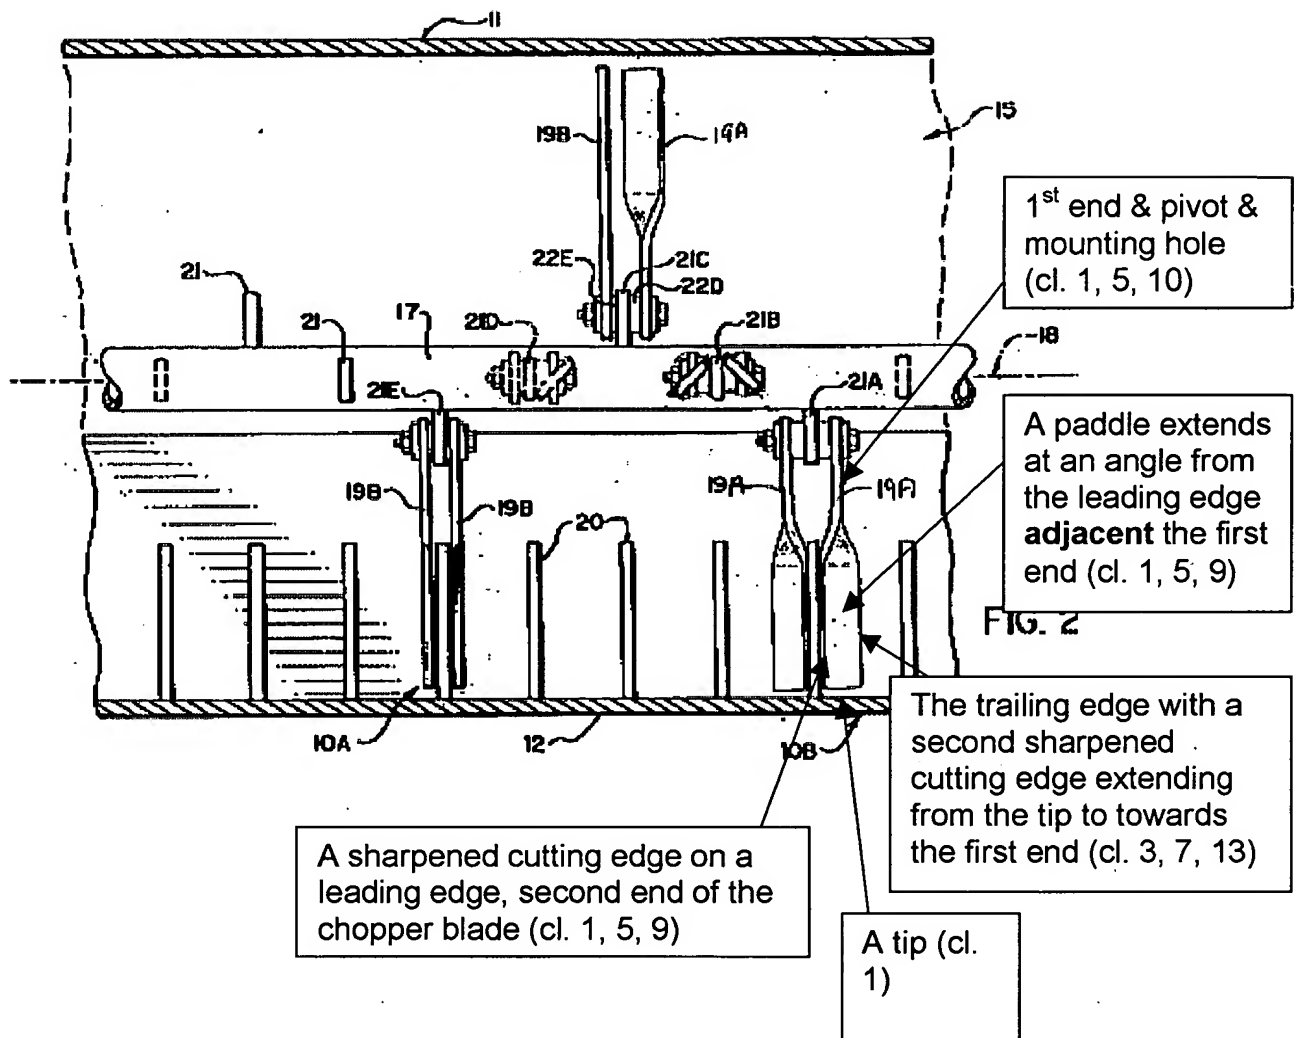

2. Claims 1-14 are rejected under 35 U.S.C. 102(b) as being anticipated by Redekop (US 2002 0004417 A1).

Redekop discloses as shown in the marked up drawings for greater clarity:

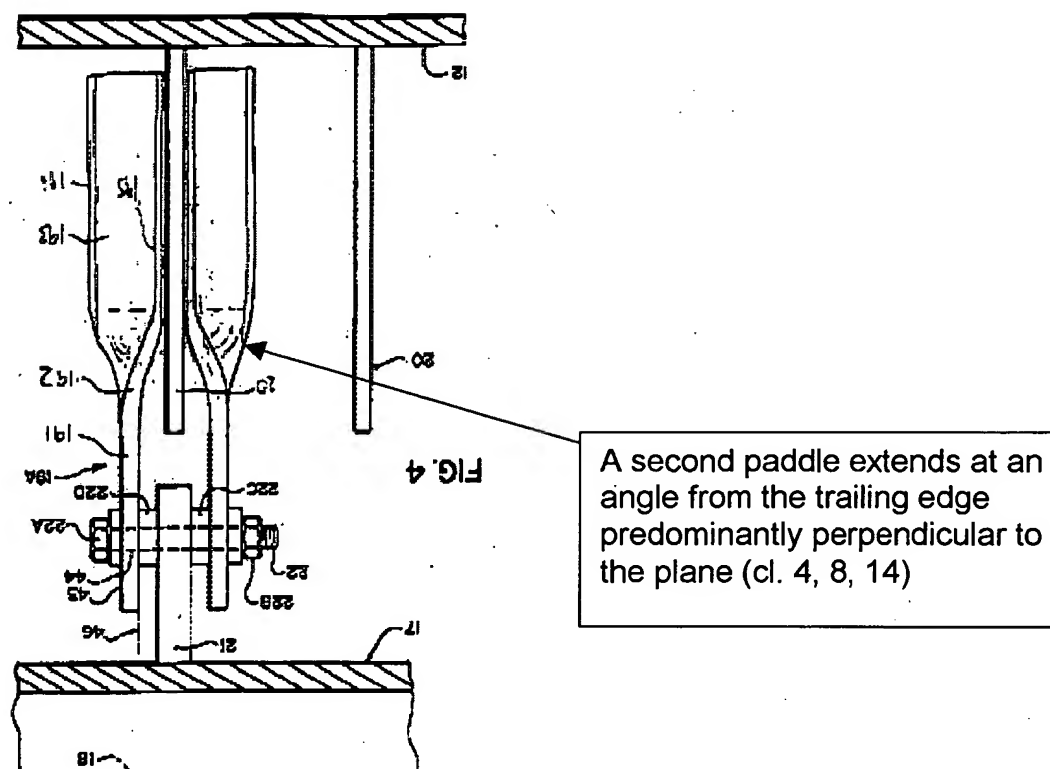

It is noted that the paddle is adjacent to the first end (also to the second end).

Merrian Webster's Collegiate Dictionary (10th Edition) defines "adjacent" as "not distant" and "nearby" and "having a common endpoint or border" and "immediately preceding or following," thus as shown below the paddle is adjacent to the first end.

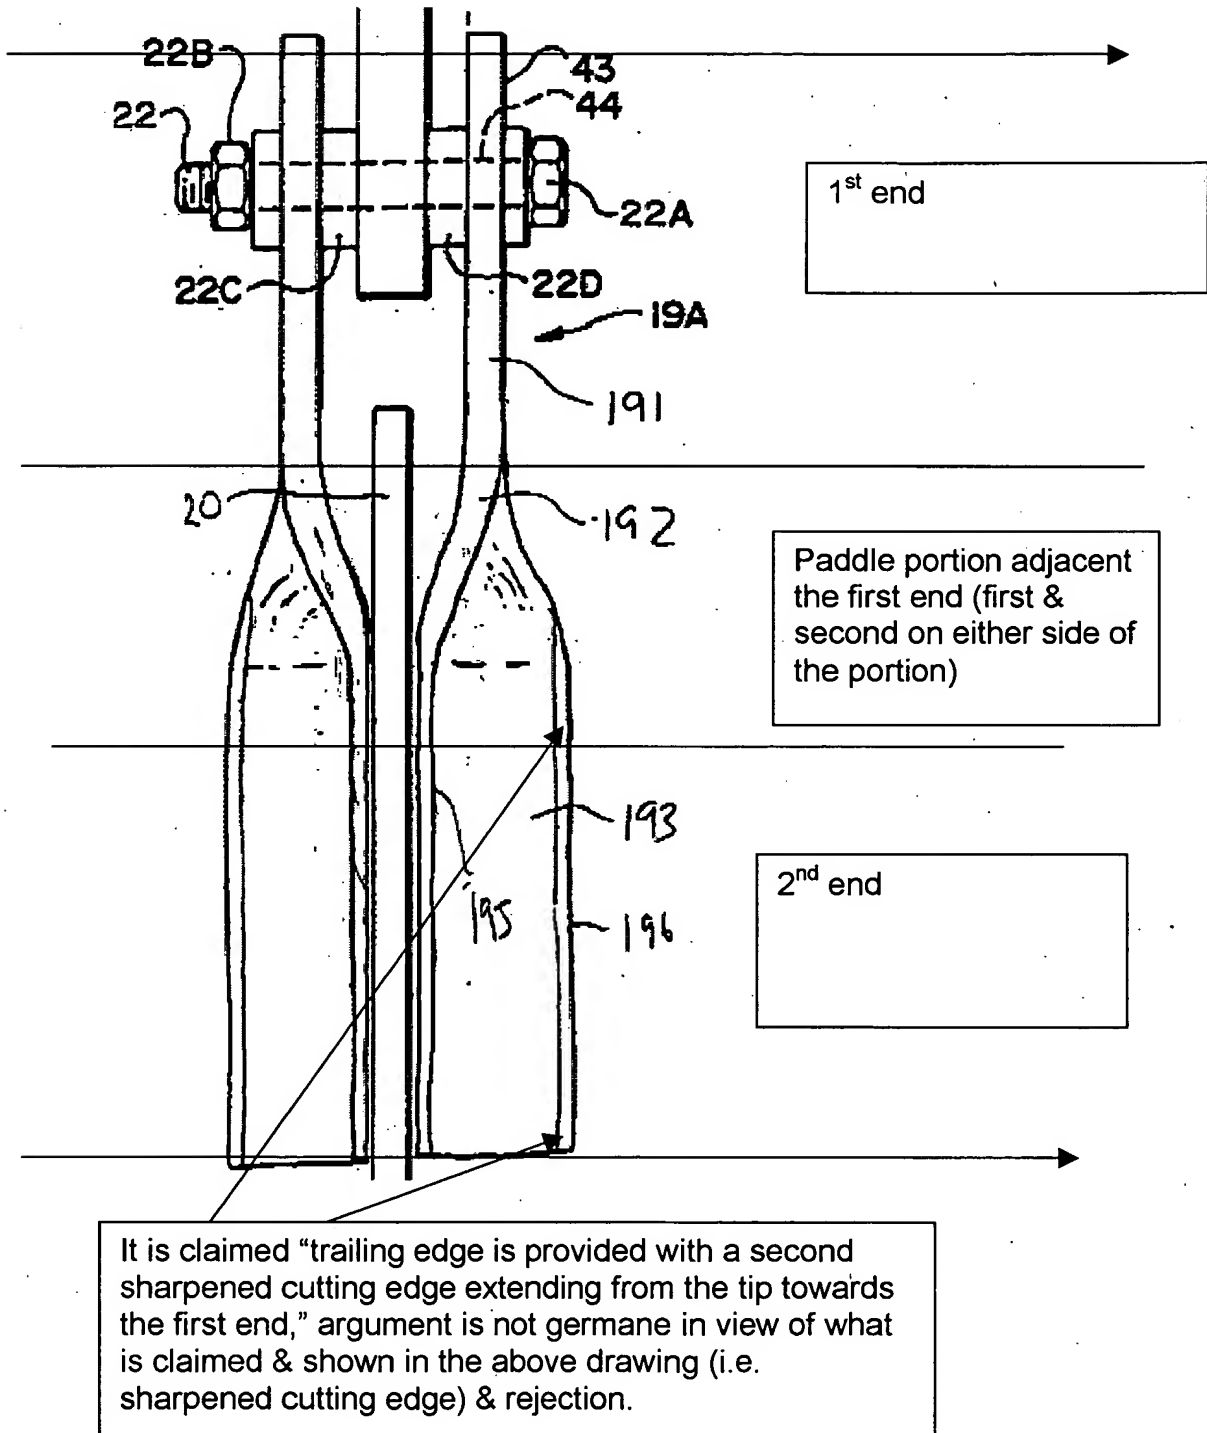

In re cl. 5: in the drawing below, it is shown that the paddle is positioned on the leading edge between the mounting hole and the cutting edge.

in re claims 2, 6, 12: wherein the blade defines a plane and the paddle is predominantly perpendicular to the plane (as shown in fig 2);

in re claim 11: wherein the integral paddle is opposite the mounting hole (see fig 2);

Response to Arguments

3. Applicant's arguments filed 6/27/2005 have been fully considered but they are not persuasive.

4. In re arguments that Redekop does not teach "a paddle extends at an angle from the leading edge" is not agreed with, since as shown above the paddle is at angle to the leading edge.
